The Great Canadian Tour visits Ontario's Boreal Forest. Airing August 10 at 9:00pm

See how CPAC The Great Canadian Tour is promoting the show:

Join **Glen** as he travels 600 kilometres north of **Thunder Bay** to **Big Trout Lake** where the **Kitchenuhmaykoosib Inninuwug (KI)** have lived for thousands of years surrounded by the **Boreal Forest**. It is one of the last, great, undeveloped spaces on the planet and is one of the world's largest intact ecosystems. Glen talks with KI community leaders who were recently incarcerated after protesting the development of a mineral exploration site on their land without consultation. He'll also talk with the **Wildlands League**, an environmental group that has been lobbying the Ontario Government to protect this valuable and essential ecosystem. We'll also learn more about the Ontario Government's recent plan to safeguard the forest by reforming and modernizing the Mining Act.

Glen also visits the **nation's capital** to take you on a visual historic tour of **Parliament Hill**.

Visit The Great Canadian Tour site [here](#).

Did You Know?

That Ontario is home to the most southern population of polar bears in the world?
