**Wildlands League supporters reject exemption for industries from ESA for caribou**

Thank you to all those who recently sent letters to Ontario letting the government know that you reject its plans to exempt all industries from the Endangered Species Act (ESA) for caribou.

Over 520 letters were sent in. Even though the official deadline for public comments has passed you can still let the Minister of Natural Resources, Linda Jeffrey know what you think by emailing her directly [here](#).

Minister of Natural Resources Linda Jeffrey is jeopardizing the recovery of caribou in Ontario and failing to uphold her own North American-leading endangered species legislation. We will continue to fight this exemption and keep you posted on our progress.
