Hello Todd,

Thank you for our call last week. I appreciated you taking the time to walk with me through all of the questions from my emails in that level of detail. I believe that you now understand where I am coming from quite well.

So I will now await expedient response from the Ministry to those questions as, outstanding any official reply, you will understand how seriously undermine our general confidence in the current reporting regime associated with the project's permitting.

Best regards

~T
